EDUCATION

University of Oxford – Magdalen College **Oxford, UK**
MEng Engineering Science, Third Year *Class of 2023*

- Exhibitioner of the College Award; Expected 2:1
- Relevant Coursework: AI and Machine Learning, High Performance Computing, 3D Printing & CAD

The American Robert College of Istanbul **Istanbul, Turkey**
High School Diploma *Oct 2014 – May 2019*

- 91.23 % Average
- Relevant Coursework, Social Innovation, Design Thinking, Java Programming

WORK EXPERIENCE

Oxford Strategy Challenge, Jaguar Land Rover **Oxford, UK**
Project Intern/ Mentee *June 2020 – Oct 2020*

- Developed a Deep Reinforcement Learning Model to develop a strategy for a mobile object with lidar sensors to avoid obstacles
- Used Deep Deterministic Policy Gradient Agent that computes an optimal policy that maximizes the long-term reward and performed root-cause analysis to achieve a robust and optimized design.
- Implemented control systems through the mentorship of a Machine Learning Engineer at JLR to optimize/expand the model.

MonAI Financial Assistance App **Istanbul, TR**
R&D Intern *April 2018 – Jan 2019*

- Participating in the implementation of Artificial Intelligence in Fintech.
- Used benchmarking to help develop a smooth AI to Customer Service transition in the after sales.
- Translating the texts from Turkish to English in preparation of the app launching in the US.

RESEARCH

University of Oxford, Department of Engineering Science **Oxford, UK**
Research Intern *June 2021 – Aug 2021*

- Explored sonification, mapping of data to produce audible signals, as a more accessible alternative data-analysis method for engineers and scientist with visual impairments/
- Collaborated with Oxford's Faculty of Music, the History of Science Museum, and Grammy award-winning Evan Ziporyn to create virtual instruments that are derived from the structure of crystals.
- Generated accurate 3D models from structural information

Torr Vision Group, GQN ML Research **Oxford, UK**
Research Trainee *Oct 2020 – Nov 2020*

- Processed data by executing high performance GPU Cluster computing on the university supercomputer
- Pair programmed with a PhD student in the research team and maintained Git workflows for version control
- Conducted research on Generative Query Networks, Convolutional Neural Networks and LSTMs, learning about the foundations of Deep Learning and fundamentals of Pytorch.

ADDITIONAL INFORMATION

Languages:	Fluent in English, Turkish
Programming Languages:	Java, Python, C
Data Science & Machine Learning:	SQL, Pytorch, Tensorflow, Tableau, Linux, Git, CUDA, Excel
Miscellaneous Technologies:	Proficient in Microsoft Office, MATLAB, CAD, Solidworks, Slack
